

Pathway Perceptions Bike Lanes:

SAFER STREETS FOR ALL ROAD USERS IS A NATIONAL EFFORT!

Green colored bike lane surfacing is a safety feature that communicates to road users that a portion of the roadway has been set aside for preferential or dedicated use by bicyclists and serves as a continuous reminder to drivers of the possibility of the presence of bicyclists as they merge or change lanes.

Pathway Perceptions Durable Pavement Markings are the most cost effective, high definition color marking on the market today. This innovative system is supplied with pre-packaged aggregate making application easy and the green surface durable and able to withstand bike traffic and vehicular traffic.
