

## ***Pathway Perceptions (PPR)*** Bus Lanes:

*Transpo is proud to announce **Pathway Perceptions** is being used for bus lane demarcation in both New York City and Chicago.*

**Pathway Perceptions** Durable Pavement Markings are the most cost effective, high definition color marking on the market today.

**Pathway Perceptions** Transportation officials look at Methyl Methacrylate (MMA) as the optimal material for special use lane marking material. It is capable of full cure in a wide range of temperatures down to 40° F and adheres both concrete and asphalt surfaces. MMA symbols and striping develop a strong bond to existing MMA therefore **Pathway Perceptions** is a viable alternative to standard markings.
